

Boardroom Update.

Client: National Grid.

Business: National Grid is an international electricity and gas company and one of the largest investor-owned energy companies in the world.

Site: London.

Work undertaken: To update office boardroom.

Value: 50K.

Work period: 4 Weeks.

SOUTH ANSTON

Note: All works undertaken and managed by South Anston operatives and management not by South Anston Limited.

National Grid own the high-voltage electricity transmission system in England and Wales and operate the system across Great Britain. They deliver gas to a 11 million consumers in an area covering approximately a quarter of the UK as well as running a number of businesses operating in related areas such as metering and inter-connectors.

The project centred around modernising the existing London office boardroom which included altering the lighting, re-flooring and adjusting the distribution of power to the room. A bespoke partition wall was also erected to allow state-of-the-art audio visual equipment to be installed. Additionally, to provide our clients with a quality finish to the room, it was entirely redecorated incorporating new carpets and curtains.

The fabric budget for this project was £50,000 and the delivery cost came to £45,000. The job was carried out within 4 weeks and subsequently came to completion on time and under budget.

Testimonial :

“ Dear Team-

I just wanted to take a minute out of your busy days to thank you for all the hard work you put into to make our Strand and Warwick Board room makeovers a huge success! I know that you all worked long hours and over came many hurdles to meet the time schedules and solve technical issues. Your professionalism and team work was noted!

I can honestly tell you that the Executive Directors, Board Members and I are all extremely pleased with the outcome. These are state-of-the-art rooms that National Grid is proud to own and use for our top level meetings. They are now allowing us to communicate better than ever before with our colleagues in other locations whilst reducing our travel and making us all more productive.

Thank you!!

All the best ”

Cheri Warren
Chief of Staff to the CEO
National Grid

Whilst carrying out this project South Anston managers liaised with many other specialist contractors to ensure seamless integration and the project was completed to the highest standard.

An O&M manual was handed to the client on completion.
